I. Catalog Description (Credit Hours of Course): Practical research skills, the principles underlying research, and specific steps used in applied research are examined, along with writing about research projects. (2)

II. Co- or Prerequisite(s):

III. Purposes or Objectives of the Course (optional):

1) State the significance of scientific research findings for the practice of clinical psychology.
2) Evaluate the psychologist’s role in the research process as it relates to the level of professional training.
3) Recognize the clinical psychologist’s obligations to conduct and report research in an ethical manner.
4) Identify the specific mechanism or strategy the researcher uses to collect, manipulate, or interpret data.
5) Identify a research problem and describe it in precise terms.
6) State the difference between research planning and research methodology.
7) Distinguish the characteristics of quantitative and qualitative approaches.

Add additional Objectives as needed

IV. Student Learning Outcomes (Minimum of 3):

1) The student will compare quantitative and qualitative approaches to data collection.
2) The student will explain the strengths and weaknesses of mixed-methods approaches to research questions.
3) Given a specific research question, the student will describe what approach is best suited to that question, and what statistical analyses would be appropriate.

Add additional SLOs as needed

V. Optional departmental/college requirements:
A. 
B. 

VI. Course Content or Outline (Indicate number of class hours per unit or section):
A. See syllabus attached.
B. 
C.

SEMESTER

COURSE DESCRIPTION
This course will provide the foundation for the acquisition of practical research skills. The course expands from the selection of a definable problem, through the literature search, to the elaboration of hypothesis and initial methodological considerations. After learning about the basic principles and the specific steps utilized to conduct applied psychological research, the student will be able to write the introductory section of his/her research project.

COURSE OBJECTIVES
The student should be:
1. State the significance of scientific research findings for the practice of clinical psychology.
2. Evaluate the psychologist’s role in the research process as it relates to the level of professional training.
3. Recognize the clinical psychologist’s obligations to conduct and report research in an ethical manner.
4. Identify the specific mechanism or strategy the researcher uses to collect, manipulate, or interpret data
5. Identify a research problem and describing it in precise terms
6. States the difference between research planning and research methodology
7. Distinguish the characteristics of quantitative and qualitative approaches

COMPETENCIES
A. KNOWLEDGE
1. Identify the elements of the scientific method and explain their relationship to psychological research.
2. Distinguish basic, applied and action research.
3. Identify the tools of scientific research.
4. Evaluate research problems according to the scientific criteria of relevance and feasibility.
5. Evaluate research questions appropriate to psychological investigations.
6. Compare and contrast research and statistical hypotheses.
7. Establish the difference between a research plan and a research design.

B. SKILLS
1. Select various types of existing psychological studies and evaluate them in terms of the characteristics of scientific research.
2. Discover the resources available in the library for psychological investigation.
3. Write clear statement for researchable problems
4. Perform a computer search of the literature related to the research problem.

C. ATTITUDES
1. Comply with APA ethical standards for the design and conduct of the research study.
2. Recognize the psychologist role as subject advocate in research situations.
3. Respect the privacy and confidentiality principles in scientific research.
4. Distinguish between personal and researchable problems in psychological investigations.

CONTENT OUTLINE

I. THE RESEARCH PROCESS
   A. Definition of research
   B. Scientific Mode of Inquiry
   C. Characteristics of Scientific Research
   D. Classification of psychological research
   E. Purpose of psychological research
   F. Ethics in psychological research

Reading Assignments:

II. THE TOOLS OF SCIENTIFIC RESEARCH
   A. The Library and its Resources
   B. Measurement Techniques
   C. Statistical Methods
   D. The computer and its software
   E. The Language as a tool of research

Reading Assignments:

III. RESEARCH PLANNING AND DESIGN
   A. The Statement of the Problem
   B. Research Questions and Hypothesis
   C. The Review of the Literature
   D. General criteria for a research project
   E. Comparing quantitative and qualitative approaches

Reading Assignments:

IV. TYPES OF DATA COLLECTION TECHNIQUES
   A. Direct observation
B. Standardized versus investigator instruments
C. Standardized personality inventories
D. Attitudes scales
E. Questionnaires
F. Interviews

Reading Assignments:

V. READABILITY OF THE RESEARCH REPORT
A. Content and Organization
B. Technical details
C. APA Format and Style

Reading Assignments:

STRATEGIES
1. Lectures
2. Small and Large Group Interactions
3. Use of audio-visual aids
4. Library laboratories
5. Analysis of Research Reports
6. Assignments

RESOURCES
1. Samples of Research Projects
2. Audio-visual aids
3. APA Manual
4. Reference Materials
5. Handouts
6. Assigned and suggested Articles
7. Library Staff

EVALUATION CRITERIA
1. Midterm Exam………………………………………………………….30%
2. Attendance………………………………………………………………10%
3. Research Project……………………………………………………….30%
4. Final Exam……………………………………………………………….30%

OTHER IMPORTANT INFORMATION

Diversity Statement
Diversity relates to the acknowledgement of the human condition in all manifestations; its similarities and differences. Diversity seeks to understand different biopsychosocial experiences. It strives towards the human values of equality, respect, and acceptance, within a multicultural world whose boundaries have been overshadowed by technology and globalization. Diversity is the antithesis to oppression in all its manifestations (e.g. sexism, racism, exploitation) and to discrimination in any form, including discrimination due to sexual orientation, physical (dis) Abilities, socioeconomic status, worldviews, places of origin, cultural orientation, primary language, or to any other human characteristic, preference or state.

The notion of diversity is central to the study of human behavior. It requires the development of self-awareness of prejudiced attitudes. It includes understanding of differences in worldviews associated to the
psycho-cultural and psycho-economic background of recipients of psychological services. Our training program promotes the awareness of subtle and “invisible” prejudice (e.g. homophobia) acquired during formative years.

**Request for Reasonable Accommodations**

Students in need of accommodation based on the impact of a disability should contact the professor privately to discuss the specific need. Students with documented disabilities should contact the Academic Deanship Office to coordinate reasonable accommodations.

**Attendance Policy**

After three absences for a 3 credit course, or 2 absences for a 2 credit course, the student will automatically be dropped from the class unless the professor recommends otherwise. The complete institutional attendance policy is included in the Appendix.

**Honor Code Reminder**

Any violation of the ethical dispositions of our institution or program will be automatically referred to the corresponding authorities. For the present course, plagiarism may lead to obtaining a grade of “0” on the plagiarized work and this would most probably lead to a failing grade in the course. Students found to violate this policy may be referred to the institutional Promotions Committee with a recommendation of dismissal from the program. The complete plagiarism policy is included in the Appendix.

**Note**

This syllabus is a guide and is subject to change according to circumstances that may arise during the semester. Students are responsible for all announced changes in the syllabus.

**TEXTBOOK**

**BIBLIOGRAPHY**

APPENDIX

INSTITUTIONAL ATTENDANCE POLICY

Attendance at lectures and laboratory exercises is mandatory unless excused because of illness or by previous authorization of the professor in charge of the course. Each department will decide the relative weight to be given to the attendance in calculating the final grade.

Attendance to clinical activities involving patients, patient models, and similar types of activities is considered part of the students’ professional responsibility and is mandatory. Absence may be excused after the student consults with the respective department chairperson. Three unexcused absences may adversely affect the final grade for a course.

Incomplete work due to illness or other serious circumstances during the course will be handled according to departmental policies, which must be provided to the students in writing at the beginning of each term. Faculty are not obligated to repeat lecture/laboratory topics that were presented at scheduled times and dates.

PROGRAM POLICY ON ACADEMIC HONESTY AND PLAGIARISM

There are different ways in which a student may incur in one of the various forms of academic dishonesty. Lack of knowledge does not justify academic dishonesty as common sense usually helps to prevent potentially problematic situations. In case of doubt, the standards of academic honesty call for the student to ask the professor or advisor. The most frequent form of academic dishonesty is plagiarism. According to the Random House Webster’s college Dictionary plagiarism is: “the unauthorized use of the language and thoughts of another author and the representation of them as one’s own. 2. something used and represented in this manner”.

Our faculty recognizes that plagiarism in any of its forms and/or manifestation is a serious offense both in the academic and the professional world. Some of the acts that constitute plagiarism are:
   a. Using words or thoughts of authors without giving due credit.
   b. Presenting work done for one course to fulfill the requirements of another course (self-plagiarism).
   c. Taking credit for phrases or ideas of other authors to produce a collage of ideas that have not been created by the student.
   d. Not using quotation marks to identify the exact words of an author.
   e. Taking information from Internet without citing the source.
   f. Buying papers from the Internet or from other sources.
   g. Using another student’s paper or clinical report to satisfy course requirements.

Each professor will evaluate alleged cases of academic dishonesty and will proceed to deal with each case according to institutional policies and procedures.
