Playing a video game, downloading MP3s, or talking on a cell phone depend on software. Computer scientists design, analyze and develop software for the computer systems and networks that power today’s world. Software applications include personal computing, entertainment systems, and life-critical applications such as medical and flight systems. Computer scientists are the people that develop this software, which requires a high degree of specialization. The computer science program at Southeast is one of only five programs in Missouri to hold accreditation by the Computing Accreditation Commission of ABET, (http://www.abet.org).

Computer Science students will…
- Obtain a thorough understanding of the fundamental principles of computing and mathematics.
- Demonstrate fundamental software engineering skills on a non-trivial project to the satisfaction of a client.
- Demonstrate programming proficiency in a modern language.
- Be prepared to enter the workforce or be accepted into the graduate school of choice.

Career Planning
Career preparation is part of the mission of Southeast. In fact, more than 90% of Southeast students participate in internships, clinical opportunities, student teaching, research assistantships, and study abroad. All graduates find employment in their field or start the graduate programs of their choice within a few months of graduation.

Professional career counselors are available for all students. The Office of Career Services in Academic Hall 057 can provide students with professional career counseling, resume critiques, practice interviews, job search strategies, career events, networking opportunities, and more.

- Missouri State University
- Auburn University
- University of Illinois

Admission Requirements
A high school student interested in majoring in Computer Science should complete four years of mathematics that includes trigonometry and an introduction to calculus. Four years of science, which includes both chemistry and physics is highly recommended. A strong background in English is essential.
This is a guide based on the 2016-2017 Undergraduate Bulletin and is subject to change. The time it takes to earn a degree will vary based on several factors such as the area of specialization chosen by the student, dual enrollment, remediation, and summer enrollment. Students will meet with an academic advisor each semester and use DegreeWorks to monitor their individual progress.

### CURRICULUM CHECKLIST

“Critical Courses” are italicized and bolded. Data shows that students who have completed this course in the first two years and have earned the noted grade are most likely to complete this program of study.

**Computer Science Required Courses:**
A grade of ‘C’ or better is required in each course that is a prerequisite course.
- CS003 Computer Science Assessment (0)
- CS155 Computer Science I (4)
- CS245 Discrete Structures I (3)
- CS265 Computer Science II (4)
- CS280 Computer Systems (3)
- CS300 Computer Science III (4)
- CS315 C and the Unix Environment (3)
- CS331 Applications Programming (3)
- CS345 Discrete Structures II (3)
- CS350 Analysis of Algorithms (3)
- CS380 Computer Operating Systems (3)
- CS390 Programming Languages (3)
- CS440 Database (3)
- CS445 Software Engineering I (3)
- CS480 Data Communications (3)
- CS495 Senior Seminar (1)
- MA140 Analytic Geometry and Calculus I (5)
- MA145 Analytic Geometry and Calculus II (4)
- MA223 Elementary Probability and Statistics (3)
- MA345 Linear Algebra (3)
- IU09 Writing for Science and Technology (3)
- UI450 Capstone Experience (3)

Choose 3 hours of CS300-599 level elective:
- CS Elective (3)

**Cognate Discipline Support:**
There is a 12-hour science requirement, which must include a two-semester laboratory science sequence from among the following:
- Biology:
  - BI151 Biological Reasoning (3)
  - BI153 Introduction to Organismal Biology (4)
  - BI154 Genetics and Cellular Biology I (4)
  - OR
- Chemistry:
  - CH185 General Chemistry (5)
  - CH186 Foundations of Inorganic Chemistry (3)
  - CH187 Inorganic Chemistry and qualitative Analysis Lab (2)
  - OR
- Introductory Physics:
  - PH120 Introductory Physics I (5)
  - PH121 Introductory Physics II (5)
  - OR
- General Physics:
  - PH230 General Physics I (5)
  - PH231 General Physics II (5)

For the remainder of the 12-hour requirement, the student must take science course(s) suitable to science majors from among Biology, Chemistry, Geosciences, Engineering Physics, or Physics.

**University Studies Requirements (not already listed above):**

*dependent upon which science sequence is chosen in the major.

Milestone: maintain 2.0 cumulative GPA

*A “Milestone” signifies a significant stage for a student in the completion of a degree.

*One of the science courses will satisfy either Living Systems or Physical Systems

**Degree requirements for all students:** a minimum of 120 credit hours, completion of University Studies program, career proficiencies (CL001-004), Writing Proficiency Exam (WP003), and completion of the Measure of Academic Proficiency and Progress (MAPP) at the senior level.

Refer to the Undergraduate Bulletin or DegreeWorks for additional graduation requirements (i.e. minimum GPA and coursework) for your program of study.
