Build your dream..But..Build it Green!

Green Building and Energy Efficiency
Helping your business position itself for economic recovery.

Training Workshop
Friday
November 5, 2010
Ameren Corporate Offices
St. Louis, MO 63103
http://semo.edu/iet/green.htm
Overview

Southeast Missouri State University, LeeCor Systems, Superior Wall Systems and Verdatek Solutions LLC invite you to network and learn about the basics of energy efficient "green" building and how current code development makes it critical to the performance of buildings and your business. Matt Belcher, CGP will provide real world applied training of the variables associated with high performance building design, construction and development.

Attendees will learn to:
- Implement green construction techniques....
- Identify and select green materials.....
- Explain the benefits of green housing to your customers.....
- Market your environmentally sound practices

Co-sponsored by:

Southeast Missouri State University
Department of Industrial & Engineering Technology Resource center (TRC)

Verdatek Solutions LLC
www.verdatek.com

See website for full course listing!

Instructor

Matt Belcher, CGP, is a nationally recognized, award winning homebuilder/ developer, author and an in-demand speaker/trainer for associations wishing to establish green building programs. He has been actively involved in the St. Louis area construction industry for three decades, including six years as a top building code official. Belcher Homes specializes in building Sustainable “green” homes, light commercial construction and low-impact development. Mr. Belcher serves on the National Association of Homebuilders Board of Directors and NAHB’s Green Building and Energy sub-committees and NAHB’s Building Codes and Standards sub-committee. He serves on the Board of Directors of The Green Building Initiative. Mr. Belcher was the 2007 President of the Home Builders Association of St. Louis and Eastern Missouri. He chaired both the 2006 NAHB National Green Building Conference in Albuquerque NM and the 2007 Conference held in St. Louis. Mr. Belcher was recently invited to testify to the U.S. House Energy and Air Quality Subcommittee on Climate Benefits of Improved Building Energy Efficiency.
