SOUTHEAST MISSOURI STATE UNIVERSITY

Department of Physics       PH400

Topics in Physics and Engineering       New Course 2001

I. Catalog Description and Credit Hours of Course:
The study of subject matter not included in the regular departmental curriculum. Course
title will vary. Format may include lectures, labs, seminars, or other forums as required
by the specific course. Prerequisites: PH231, MA245, or Instructor permission. (3)

II. Prerequisite(s):

PH231, MA245, or Instructor permission

III. Purposes or Objectives of the Course:

A. To offer students the opportunity to study topics that are not part of the regular
curriculum, but may be of interest to them and to individual faculty members.
B. To offer students the opportunity to study in greater depth topics that are covered
only superficially in other courses.
C. To provide a vehicle to offer courses of the type described in A and B above.

IV. Expectations of Students:

To be determined by the instructor.

V. Course Content:

To be determined by the instructor.

VI. Textbook(s) and /or Other Required Materials or Equipment:

To be determined by the instructor.

VII. Student Evaluation:

To be determined by the instructor.
