Student Guidelines for Construction of the TWS

The Vision
Successful teacher candidates support learning by designing a Teacher Work Sample that employs a range of strategies and builds on each student’s strengths, needs, and prior experiences. Through this performance assessment, teacher candidates provide credible evidence of their ability to facilitate learning by meeting the following TWS standards:

- The teacher uses information about the learning-teaching context and student individual differences to set learning goals and plan instruction and assessment.
- The teacher sets significant, challenging, varied, and appropriate learning goals.
- The teacher uses multiple assessment modes and approaches aligned with learning goals to assess student learning before, during, and after instruction.
- The teacher designs instruction for specific learning goals, student characteristics and needs, and learning contexts.
- The teacher uses an understanding of individual and group motivation and behavior, creating a safe learning environment.
- The teacher uses regular and systematic evaluations of student learning to make instructional decisions.
- The teacher uses assessment data to profile student learning and communicate information about student progress and achievement.
- The teacher reflects on his or her instruction and student learning in order to improve teaching practice.

Your Assignment
The TWS contains eight teaching processes (nine if the Family Involvement Plan is included) identified by research and best practice as fundamental to improving student learning. Each Teaching Process is followed by a TWS Standard, the Task, a Prompt, and a Rubric that defines various levels of performance on the standard. The Standards and Rubrics will be used to evaluate your TWS. The Prompts (or directions) help you document the extent to which you have met each standard. You are required to teach a comprehensive unit. Before you teach the unit, you will describe contextual factors, identify learning goals based on your state or district content standards, create an assessment plan designed to measure student performance before (pre-assessment), during (formative assessment) and after (post-assessment), and plan for your instruction. After you teach the unit, you will analyze student learning and then reflect upon and evaluate your teaching as related to student learning.

Format

- **Charts and Graphs**: Charts, graphs, and assessment instruments are required as part of the analysis of learning element. These should appear in the analysis or as separate files saved in the Analysis of Student Learning section.

You may also want to provide other documents, such as student work. However, you should be very selective and make sure your choices provide clear, concise evidence of your performance related to TWS standards and your students’ learning progress.
- **Narrative length**: A suggested page length for your narrative is given at the end of each component section. You have some flexibility of length across components, but the total length of your written narrative (excluding charts, graphs, attachments and references) should not exceed twenty (20) word-processed pages, double-spaced in 12-point font, with 1-inch margins.
- **References and Credits**: If you referred to another person’s ideas or material in your narrative, you should cite these in a separate section at the end of your narrative under References and Credits and put them in the Appendix. You may use any standard form for references; however, the American Psychological Association (APA) style is a recommended format (explained in the manual entitled “Publication Manual of the American Psychological Association” and discussed on the Kent Library webpage: http://library.semo.edu/learn/citing.shtml).
• Anonymity. In order to insure the anonymity of students in your class, do not include any student names or identification in any part of your TWS.

On the following page a scope and sequence chart illustrates at what point in the teacher preparation program students will be introduced to the TWS elements and how that introduction is reinforced through the various blocks.
Scope and Sequence of Teacher Work Sample elements across Blocks

## Teaching Processes, TWS Standards, and Indicators

### Contextual Factors
*The teacher uses information about the learning-teaching context and student individual differences to set learning goals and plan instruction and assessment.*
- Knowledge of community, school, and classroom factors
- Knowledge of characteristics of students
- Knowledge of students’ varied approaches to learning
- Knowledge of students’ skills and prior learning
- Implications for instructional planning and assessment

### Learning Goals
*The teacher sets significant, challenging, varied and appropriate learning goals.*
- Significance, Challenge and Variety
- Clarity
- Appropriateness for students
- Alignment with national, state or local standards

### Assessment Plan
*The teacher uses multiple assessment modes and approaches aligned with learning goals to assess student learning before, during and after instruction.*
- Alignment with learning goals and instruction
- Clarity of criteria for performance
- Multiple modes and approaches
- Technical soundness
- Adaptations based on the individual needs of students
- Opportunities for students to self evaluate, set, monitor, and adjust learning goals

### Design for Instruction
*The teacher designs instruction for specific learning goals, student characteristics and needs, and learning contexts.*
- Alignment with learning goals
- Accurate representation of content
- Lesson and unit structure
- Use of a variety of instruction, activities, assignments and resources
- Use of contextual information and data to select appropriate and relevant activities, assignments and resources.
- Use of technology

### Classroom Management
*The pre-service teacher uses an understanding of individual and group motivation and behavior to create a learning environment that encourages social interaction, active engagement in learning and self-motivation.*
- Importance of content
- Management of transitions
- Expectations
- Monitoring of student behavior
- Consequences for misbehavior
- Motivation

### Instructional Decision-Making
*The teacher uses ongoing analysis of student learning to make instructional decisions.*
- Sound professional practice
- Adjustments based on analysis of student learning
- Congruence between modifications and learning goals

### Analysis of Student Learning
*The teacher uses assessment data to profile student learning and communicate information about student progress and achievement.*
- Clarity and accuracy of presentation
- Alignment with learning goals
- Interpretation of data
- Evidence of impact on student learning
Reflection and Self-Evaluation
The teacher reflects on his or her instruction and student learning in order to improve teaching practice.
- Interpretation of student learning
- Reflection on instruction and student learning
- Insights on effective instruction and assessment
- Alignment among goals, instruction and assessment
- Implications for professional development
- Reflection on teaching performance
- Accessing special services
- Ethical practice

Family Involvement Plan
The teacher involves children’s families in the unit of study. A strong home/school connection is important for children’s success in this unit.
- Family and community resources
- Family communication
- Family involvement: school-based
- Family involvement: home-based
- Family letter
Contextual Factors

TWS Standard
The teacher uses information about the learning-teaching context and student individual differences to set learning goals and plan instruction and assessment.

Task
Discuss relevant factors and how they may affect the teaching-learning process. Include any supports and challenges that affect instruction and student learning.

Prompt
In your discussion, include:

· **Community, district and school factors.** Address geographic location, community and school population, socio-economic profile and race/ethnicity. You might also address such things as stability of community, political climate, community support for education, and other environmental factors.

· **Classroom factors.** Address physical features, availability of technology equipment and resources and the extent of parental involvement. You might also discuss other relevant factors such as classroom rules and routines, grouping patterns, scheduling and classroom arrangement.

· **Student characteristics.** Address student characteristics you must consider as you design instruction and assess learning. Include factors such as age, gender, race/ethnicity, special needs, achievement/developmental levels, culture, language, interests, learning styles/modalities or students’ skill levels. In your narrative, make sure you address student’s skills and prior learning (prior learning evidence may be an examination of school’s curriculum, informal conversation with a previous grade level teacher cooperating teacher) that may influence the development of your learning goals, instruction and assessment. (For any student who leaves the classroom, indicate the purpose.)

· **Instructional implications.** Address how contextual characteristics of the community, classroom and students have implications for instructional planning and assessment. Include specific instructional implications for at least two characteristics and any other factors that will influence how you plan and implement your unit.

Suggested Page Length: 1-2
### Contextual Factors Rubric

**TWS Standard:** The teacher uses information about the learning/teaching context and student individual differences to set learning goals, plan instruction and assess learning.

Total Points __________
Learning Goals

TWS Standard
The teacher sets significant, challenging, varied and appropriate learning goals.

Task
Provide and justify the learning goals for the unit.

Prompt
· List the learning goals (not the activities) that will guide the planning, delivery and assessment of your unit. These goals should define what you expect students to know and be able to do at the end of the unit. The goals should be significant (reflect the big ideas or structure of the discipline) challenging, varied and appropriate. Number or code each learning goal so you can reference it later.
· Show how the goals are aligned with local, state, or national standards. GLE’s must be included. (Identify the source of the standards).
· Describe the types and levels of your learning goals. Bloom’s Taxonomy may be helpful here or DESE’s Levels of Knowledge (http://www.dese.mo.gov/divimprove/sia/msip/DOK_chart.pdf).
· Discuss why your learning goals are appropriate in terms of development; pre-requisite knowledge, skills; and other student needs.

Suggested Page Length: 1-2 Pages
Learning Goals

Assessment Plan

TWS Standard
*The teacher uses multiple assessment modes and approaches aligned with learning goals to assess student learning before, during and after instruction.*

Task
Design an assessment plan to monitor student progress toward learning goal(s). Use multiple assessment modes and approaches aligned with learning goals to assess student learning before, during, and after instruction. These assessments should authentically measure student learning and may include performance-based tasks, paper-and-pencil tasks, or personal communication. Describe why your assessments are appropriate for measuring learning.

Prompt
· **Provide an overview of the assessment plan.** For each learning goal include: assessments used to judge student performance, format of each assessment, and adaptations of the assessments for the individual needs of students based on contextual factors. The purpose of this overview is to depict the alignment between learning goals and assessments and to show adaptations to meet the individual needs of students or contextual factors. You may use a visual organizer such as a table, outline or other means to make your plan clear (see example below).
· **Describe the pre- and post-assessments that are aligned with your learning goals.** Clearly explain how you will evaluate or score pre- and post-assessments, including criteria you will use to determine if the students’ performance meets the learning goals. Include copies of assessments, prompts, and/or student directions and criteria for judging student performance (e.g., scoring rubrics, observation checklist, rating scales, item weights, test blueprint, answer key). These copies may be saved as separate files and uploaded to your e-portfolio in this section.
· **Discuss your plan for formative assessment that will help you determine student progress during the unit.** Describe the assessments you plan to use to check on student progress and comment on the importance of collecting that particular evidence. Although formative assessment may change as you are teaching the unit, your task here is to predict at what points in your teaching it will be important to assess students’ progress toward learning goals.

Exceptional Child Block IIIA

This is not a requirement for Secondary, Elementary or Early Childhood

TWS Standard
The teacher uses multiple assessment modes and approaches aligned with learning goals to assess student learning before, during and after instruction.

Task
The teacher will learn to use multiple formal assessments that address academic, social, and emotional characteristics of students suspected of having a disability. In addition, the students will develop an Individual Education Plan (IEP) and conduct a Functional Behavior Assessment (FBA) for a student in their field experience.

- Individual Education Plan – must meet all state and federal requirements found in the State Standards and Indicators Document B. The State IEP will be used and downloaded from the DESE website. If addressed properly then all required components will be met.
- Evaluation Report – must meet all state and federal requirements found in the State Standards and Indicators Document B. Additional Standards may be required for the Diagnostic conclusion depending upon the disability of the student.
- Functional Behavior Assessment – All components as listed on rubric must be addressed with proper rationale.

| * IEP Components:  
- Demographic data  
- PLEP addresses all given areas,  
- Cognitive and/or behavioral goals (measurement of student progress),  
- Addresses transition if appropriate,  
- Address special considerations,  
- Extent of participation in regular education given, -- Placement consideration/justification given,  
- Addresses assessment appropriately,  
- Modifications and adaptations are appropriate to student’s needs.  
- List of attendees | 6 or less of the components of the IEP are addressed | 7-9 components of the IEP are addressed. | All 10 components of the IEP are filled out completely and correctly. | 1-3 points |
| * Evaluation Report Components:  
- General Information  
- Home & School History  
- Health/Motor  
- Vision  
- Hearing  
- Intellectual/Cognitive  
- Academic Readiness  
- Social Emotional & Behavioral  
- Communication  
- Adaptive Behavior  
- Formal Observation  
- Diagnostic Conclusions  
- Prescriptive Instruction Recommendations | Less than 10 components of the Evaluation Report and little (2 or less) or no recommendations for prescriptive strategies. | 11-13 components of the Evaluation Report and little 3-4 recommendations for prescriptive strategies. | Evaluation Report consolidating results from various assessment methods is completely and correctly written with 5-6 recommendations for prescriptive strategies for instruction in the classroom (14 items). | 1-3 points |
| * Functional Behavior Analysis/Behavior Intervention Plan Components:  
- Introduction  
- Description of Subject  
- Identification of Behaviors  
- Prioritize Behaviors  
- Select Target Behavior | Less than 12 components of the functional behavior analysis/behavior intervention plan plus little or no information on the analysis of data and summary. | 13-15 components of the functional behavior analysis/behavior intervention plan are written correctly and appropriately plus some information regarding the analysis of data and summary. | All 16 components of the functional behavior analysis/behavior intervention plan are written correctly and appropriately. | 1-3 points |
-Define Target Behavior
-Describe where the behavior occurs most often (setting)
-Decide on the type of data to collect and how you wish to collect it
-Collect Data
-Graph Data
-Analyze data for patterns
-Make a projection of the function of the behavior
-Select intervention and research design
-Implement strategy and continue graphing
-Analyze the data/Results
-Summary

| 1 – 3 points | 4 – 7 points | 8 – 10 points |

* Required for Exceptional Child Teacher Candidates
Design for Instruction

TWS Standard
The teacher designs instruction for specific learning goals, student characteristics and needs, and learning contexts.

Task
Describe how you will design your unit instruction related to unit goals, students’ characteristics and needs, and the specific learning context.

Prompt
• **Results of pre-assessment.** After administering the pre-assessment, analyze student performance relative to the learning goals. Depict the results of the pre-assessment in a format that allows you to find patterns of student performance relative to each earning goal. You may use a table, graph, or chart. Describe the pattern you find that will guide your instruction or modification of the learning goals.

• **Unit overview.** Provide an overview of your unit. Use a visual organizer such as a block plan or outline to make your unit plan clear. Include the topic or activity you are planning for each day/period. Also indicate the goal or goals (coded from your Learning Goals section) that you are addressing in each activity. Make sure that every goal is addressed by at least one activity and that every activity relates to at least one goal. (See example below – other formats are acceptable)

• **Activities.** Describe at least three unit activities that reflect a variety of instructional strategies/techniques and explain why you are planning those specific activities. In your explanation for each activity, include:
  - how the content relates to your instructional goal(s),
  - how the activity stems from your pre-assessment information and contextual factors,
  - what materials/technology you will need to implement the activity, and
  - how you plan to assess student learning during and/or following the activity (i.e., formative assessment).

• **Technology.** Describe how you will use technology in your planning and/or instruction. If you do not plan to use any form of technology, provide your clear rationale for its omission.

• **Lessons.** Include your lessons with this element. You can include all lessons or a representative sample that includes at least three lesson plans. *Any scanned documents or photos you upload into Foliotek save and upload as separate documents. Do not try to attach them inside a Word document.*

Example of Unit Overview
Following is one example of a Block Plan that you could use if you want.

<table>
<thead>
<tr>
<th>Monday</th>
<th>Tuesday</th>
<th>Wednesday</th>
<th>Thursday</th>
<th>Friday</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Put the topic or activity that you are planning in the table. Indicate the Learning Goal that you are addressing.

**Suggested Page Length:** 3 + visual organizer.
## Design for Instruction Rubric

Classroom Management for Instruction

TWS Standard
The pre-service teacher uses an understanding of individual and group motivation and behavior to create a learning environment that encourages social interaction, active engagement in learning and self-motivation.

Task
Develop a plan for motivation and management for the TWS unit that addresses strategies to manage the goals of group and individual student misbehavior. Organize and motivate students for a variety of instructional activities with an articulated written classroom management plan.

Prompt

• Importance of content is conveyed by the teacher’s genuine enthusiasm:
  Plan lists multiple ways the pre-service teacher will display warm, responsive interactions with students, communicating a genuine liking for and interest in students’ interests and the content taught.

• Management of transitions:
  Plan lists examples of transitions that will be used as students move from one activity to another, using routines to create a secure and predictable learning environment, helping to develop student responsibility.

• Expectations are clear:
  Plan lists expectations for behavior during learning activities. Plan tells how these expectations will be communicated to parents.

• Monitoring of student behavior:
  Plan lists culturally appropriate proactive and preventative strategies the pre-service teacher will use to help students develop self-regulation and monitor their own behavior. These should include verbal and non verbal cues that can help modify student behavior.

• Guidance and Discipline strategies / Consequences for misbehavior:
  The plan demonstrates a varied repertoire of guidance approaches to meet individual student’s behavioral needs, with the understanding that a supportive, interesting classroom environment, learning activities that are engaging, and a positive relationship with students will prevent many challenging behaviors. Natural consequences for misbehavior are given (i.e. consequence is related to the action), and consequences are shared with all stakeholders. The plan also lists specific strategies that may be needed for individual students who have special behavioral needs, as noted in the Contextual Factors. The plan includes a general seating chart with a description of how it might be changed for various activities in the TWS unit.

• Motivation strategies:
  The plan describes ways that the pre-service teacher will motivate students in their learning, focusing on intrinsic motivation strategies, rather than only using external motivators.

Suggested Page Length: 3-6 pages + classroom arrangement diagrams.
### Classroom Management Rubric

#### TWS Standard: The pre-service teacher uses an understanding of individual and group motivation and behavior to create a learning environment that encourages social interaction, active engagement in learning and self-motivation.

FAMILY INVOLVEMENT PLAN
Not required for Middle and Secondary Candidates

TWS Standard
The teacher involves children’s families in the unit of study. A strong home-school connection is important for the children’s success in this unit.

Task
Your unit also includes a family involvement plan, including using family or community resources, communicating with families throughout the unit, involving the families in both school and home-based activities and sending a family letter about the unit.

Prompt
• Family & community resources: Tell three family and/or community resources you could use to support student learning during your unit (for example, guest speakers, the public library, field trips, etc.)

• Family communication: Give three examples of how you will communicate with your students’ families before and throughout this unit (for example, a family letter, newsletters, class website, personal notes, etc.) At least one example must be a reciprocal, two-way communication strategy.

• Family involvement – School-based: Tell one way you can involve families during your unit in a school-based activity (for example, parent volunteers during an activity, Open House, parent chaperones during a field trip, etc.)

• Family involvement - Home activity: Tell one home activity you could suggest for families to do that would support student learning during your unit.

• Family letter: Create a letter that you could send at the beginning of your unit. This letter should describe your unit and give a rationale for doing it, tell the goals of your unit and list your suggested home activity. The letter should be reader-friendly with large font and graphics, attractive and free of errors.

Suggested Page Length: 2 pages plus the family letter

Instructional Decision-Making

TWS Standard

The teacher uses on-going analysis of student learning to make instructional decisions.

Task

Provide two examples of culturally appropriate instructional decision-making based on students’ learning or responses.

Prompt

- Think of a time during your unit when a student’s learning or response caused you to modify your original design for instruction. (The resulting modification may affect other students as well.) Cite specific evidence to support your answers to the following:
  - Describe the student’s learning or response that caused you to rethink your plans. The student’s learning or response may come from a planned formative assessment or another source (not the pre-assessment).
  - Describe what you did next and explain why you thought this would improve student progress toward the learning goal.

- Now, think of one more time during your unit when another student’s learning or response caused you to modify a different portion of your original design for instruction. (The resulting modification may affect other students as well.) Cite specific evidence to support your answers to the following:
  - Describe the student’s learning or response that caused you to rethink your plans. The student’s learning or response may come from a planned formative assessment or another source (not the pre-assessment).
  - Describe what you did next and explain why you thought this would improve student progress toward the learning goal.

Analysis of Student Learning

TWS Standard
The teacher uses assessment data to profile student learning and communicate information about student progress and achievement.

Task
Analyze your assessment data, including pre/post assessments and formative assessments to determine students’ progress related to the unit learning goals. Use visual representations and narrative to communicate the performance of the whole class, subgroups, and two individual students.

Prompt
In this section, you will analyze data to explain progress and achievement toward learning goals demonstrated by your whole class, subgroups of students, and individual students.

- **Whole class.** To analyze the progress of your whole class, create a table that shows pre- and post-assessment data on every student on every learning goal. Then, create a graphic summary that shows the extent to which your students made progress (from pre- to post-) toward the learning criterion that you identified for each learning goal (identified in your Assessment Plan section). Summarize what the graph and table tell you about your students' learning in this unit (i.e., the number of students met the criterion).

- **Subgroups.** Select a group characteristic (e.g., gender, performance level, socio-economic status, language proficiency) to analyze in terms of one learning goal. Provide a rationale for your selection of this characteristic to form subgroups (e.g., girls vs. boys; high- vs. middle- vs. low-performers). Create a graphic representation that compares pre- and post-assessment results for the subgroups on this learning goal. Summarize what these data show about student learning.

- **Individuals.** Select two students that demonstrated different levels of performance. Explain why it is important to understand the learning of these particular students. Use pre-, formative, and post-assessment data with examples of the students’ work to draw conclusions about the extent to which these students attained the two learning goals. Graphic representations are not necessary for this subsection. Examples of your two students’ work should be scanned and uploaded to this element.

  *Note:* You will provide possible reasons for why your students learned (or did not learn) in the next section, “Reflection and Self-Evaluation.”

Suggested Page Length: 4 + charts and student work examples

Reflection and Self-Evaluation

TWS Standard
*The teacher analyzes the relationship between his or her instruction and student learning in order to improve teaching practice.*

Task
Reflect on your performance as a teacher in guiding the instructional process of this unit and link your performance to student learning results. Evaluate your performance relative to the seven TWS standards to identify future actions for improved practice and professional growth.

Prompt
- **Reflection on your instruction and student learning.** Write a narrative identifying the two instructional strategies and activities that contributed most to student learning. Describe why you think these strategies and/or activities were effective in helping your students reach the learning goals of the unit.
- **Reflection on barriers to successful learning.** Referring back to your Analysis of Student Learning element, describe what you believe were the two greatest barriers to learning for your students in this unit. Focus only on factors you can affect as a teacher.
- **Reflection on implications for future teaching.** Re-consider the two greatest barriers to learning for your students in this unit. Discuss what you could do differently or better in your instruction in the future. Explain how these modifications would improve your students’ performance.
- **Reflection on alignment among goals, instruction and assessment.** Assess your teaching performance in this unit relative to your learning goals, instruction, and assessment. Connect this information to your student learning and effective instruction.
- **Reflection on learning community.** Describe how you worked with school colleagues, parents, and educational partners in the larger community to support student learning and well being.
- **Reflection on how to access specialized services.** It is possible that as a part of your assessment and instruction of this unit, you found that a student(s) needed specialized services. Although you may or may not have the opportunity to follow through on this, describe fully the steps you WOULD take to access specialized services for the student(s).
- **Reflection upon ethical practice:** Describe a time when you had to consciously apply professional ethical standards while teaching your unit. In addition, describe how you applied social, ethical, or legal standards when using technology in planning / teaching your unit.
- **Reflection on possibilities for professional development.** Describe one or two areas of professional growth related to the TWS standards that you believe are critical to improving your ability to facilitate student learning. These areas should emerge from the insights and experiences you have described in this section. Identify two professional growth activities that most likely will improve your performance in the critical area(s) you identified.
