Samsung Smart TV – Connecting to Southeast Ethernet

It is important to note that Wi-Fi media devices will be unable to use Southeast Secure/Southeast ResNet wireless services, as most do not come preloaded with the necessary software to be compatible with SEMO’s wireless encryption – therefore a wired Ethernet connection must be used.

Finding the MAC Address

1. Plug the TV into the LAN port using a Category 5/6 Ethernet cable.

2. Press “Menu” on the remote and scroll to “Network.”

3. Select “Wired” from “Network Type”.

4. Select “Network Test”.

![Network Test](image1)

5. At the top of the window, the **MAC address** will be visible. It will be a six two-character groups, separated by a colon. Do not worry if the network test fails.

**Registering the Device**

1. Using a computer, browse to [http://splat.semo.edu/gameconsoles/](http://splat.semo.edu/gameconsoles/).

2. Enter your Southeast Key and Password for the Username and Password, and type the aforementioned MAC address into the MAC address field, ensuring to keep the colons in the address.

3. If you agree to the User Policies, select “Accept”.

4. Restart the TV, and check to ensure that it is connected.
